-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Newly submitted claims 51-57 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: as pointed out by the applicant, the new claims are directed to a system that comprises a substance delivery device instead of a sensor while the pre-existing claims are directed to a system that comprised only a sensor. The specification deals with the sensor system and the substance delivery device as alternatives to each other as different species, see page 9, lines 18-29 and page 17, lines 1-5 of the specification

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 51-57 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Claim Objections***

2. Claim 4 is objected to because of the following informalities: in claim 4, line 1, "2" should be --1--. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 23-24 and 31 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent 6,093,156 to Cunningham et al. (Cunningham). Cunningham teaches a tissue interface member 902, a tissue-breaching member 916, and a sensor device 914. (Figs. 13 A-E of Cunningham). The tissue-breaching member and sensor device are capable of mating to the tissue interface member when the other is not mated to the interface members since they are separate components. There is a pressure differential since a vacuum is applied to the tissue. (column 30, lines 50-67 of Cunningham).

***Allowable Subject Matter***

5. Claims 1, 3, 5, 8-9, 14-16, 18-20, 32-40, and 43-50 are allowed.

6. Claims 25-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter. In regard to claim 25, the prior art does not teach or suggest an energy absorbing layer attached to the tissue interface member that is combined or combinable with the other limitations of claim 25.

### ***Response to Arguments***

8. Applicant's arguments with respect to claims 23-24 and 31 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3736

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
